

INTRODUCTION

By using Basler Electric products and services, you agree to the terms and conditions of this document. These terms and conditions may change without notice.

TERMS OF USE

Products, publications, and website content are distributed by Basler Electric with the mutual understanding that they will not be used in any manner detrimental to the interests of Basler Electric.

Products

- Dangerous voltage may be present at equipment connectors, terminals, and components. Contact with these connectors, terminals, and components may cause personal injury or loss of life. When removing a draw-out assembly from its case, do not touch the case interior. Live voltage may be present within the case.
- Equipment installation, inspection, and maintenance procedures must be performed only by qualified personnel who are thoroughly trained and who understand the hazards associated with working on the equipment. Personnel who work with the equipment should become familiar with the equipment wiring diagrams and product literature. Compliance with safety practices along with local and federal regulations for this equipment is a necessity.
- All equipment must be adequately grounded. Sensing voltage and current transformer secondary circuits should be grounded in accordance with all applicable safety standards.
- Unauthorized equipment modifications or use of the equipment outside its specified mechanical, electrical, or other operating limits may cause personal injury and property damage. Any such unauthorized modifications shall cause a termination of any warranty coverage and invalidate product certifications and listings.
- Basler Electric equipment contains electronic components which may be sensitive to electrostatic discharge (ESD). Ground yourself, your work surface, and the equipment before removing any equipment covers or draw-out assemblies. Avoid unnecessary contact with equipment components. Failure to use proper ESD procedures may damage the equipment and reduce the equipment lifespan.
- High-potential ("hipot" or Megger®) test equipment should be used with extreme care. Incorrect use of such equipment could damage system components.
- Devices equipped with password security are supplied with the passwords set to the factory-default values. To prevent unauthorized access, the default passwords should be changed to unique, private passwords. Basler Electric is not responsible for any damage or losses resulting from unauthorized access.

- Product warranty protection is preserved and product lifespan can be extended by adhering to the maintenance guidelines specified in the appropriate product documentation.
- Basler Electric disclaims, to the fullest extent permissible by applicable law, any and all liability and responsibility for any claims or damage that may arise as a result of the use of any products or services not manufactured or provided by Basler Electric.

Publications

- Information provided by Basler Electric is believed to be correct and reliable. However, Basler Electric offers no guarantee or warranty and no responsibility is assumed by Basler Electric unless otherwise expressly agreed to in writing. Basler Electric reserves the right to update any portion of its publications at any time without notice. Contact Basler Electric for the latest version of a publication.
- It is not the intention of Basler Electric publications to cover all details and variations in equipment, nor do Basler Electric publications provide data for every possible contingency regarding equipment installation or operation. The availability and design of all features and options are subject to modification without notice. Should further information be required, contact Basler Electric.
- Ignoring the warning and caution statements contained in the product literature could result in personal injury, loss of life, or equipment damage.
- Only the English-language versions of Basler Electric publications are the official, approved versions. If any questions arise regarding the accuracy of the information contained in a translated publication, refer to the English-language version of the publication. Discrepancies discovered within a translated publication should be brought to the attention of Basler Electric.
- Read the entire product manual and all other publications pertaining to the work to be performed before installing, operating, or servicing the product and associated equipment. To avoid personal injury or equipment damage, only qualified personnel should perform the procedures listed in the product literature.
- The information and illustrations provided in the product literature and software serve only as concept or product descriptions and are not to be deemed as a statement of guaranteed properties. Personnel responsible for applying the equipment addressed in the product literature must satisfy themselves that each intended application is suitable and acceptable. They also must ensure that any applicable safety or other operational requirements are within compliance.

Document FA100002	Revision D	The current version of this document is available at www.basler.com. Previous document versions are considered null and void.	Date 12/13	Copyright 2013
-----------------------------	----------------------	---	----------------------	--------------------------

Any risks in applications where a system or product failure would create a risk for property damage or harm to persons (including but not limited to personal injuries or death) shall be the sole responsibility of the person or entity applying the equipment. Those responsible must ensure that all measures are taken to exclude or mitigate such risks.

Websites

- All content on Basler Electric websites is the exclusive property of Basler Electric. Website content is protected by copyright, trademark, and other applicable laws. Basler Electric website technical information is provided for general information only and should not be relied upon or used as the sole basis for making decisions. Obtaining primary, more complete, or more timely sources of information may be required in order to make an informed decision.
- Basler Electric provides links to third-party websites and references to third-party products and services as a convenience in locating relative information, products, and services for our users. The existence of these links and references is not to be construed as an endorsement by Basler Electric of the content of any of these third-party sites, products, or services.
- Basler Electric makes no representation or warranty of freedom from computer viruses or of the accuracy of the information and/or quality of products or services provided by the products referenced or advertised on these third-party websites.
- Basler Electric disclaims, to the fullest extent permissible by applicable law, any and all liability and responsibility for any claims or damage that may arise as a result of use of any third-party website products or services.

TRADEMARK, COPYRIGHT, AND PATENT PROTECTION

- Product, brand, and organization names appearing in Basler Electric documents are the trademark or registered trademark of their respective holders. Other product and/or organization names mentioned in Basler Electric documents may be trademarks or registered trademarks of their respective companies. No Basler Electric trademarks may be used without written permission. Basler Electric reserves all rights and benefits afforded under US and international copyright laws concerning its products, firmware, software, and documentation.
- Products appearing in Basler Electric publications and on Basler Electric websites may be covered by US and international patents. Basler Electric reserves all rights and benefits afforded under US and international patent laws. These rights and benefits apply, without limitation, to Basler Electric products, firmware, and software.
- Basler Electric publications and parts thereof may not be reproduced, copied, or disseminated without the written permission of Basler Electric. Publication content may not be imparted to a third-party, placed on a website, nor used for any unauthorized purpose.

WARRANTY LIMITS

- Basler Electric makes no express, implied, or statutory warranty, including but not limited to warranty of merchantability, warranty of fitness for a particular purpose, warranty of non-infringement or the like, or warranty of title.
- Unauthorized equipment modifications constitute “misuse” and/or “negligence” within the meaning of the product warranty and thereby exclude warranty coverage for any resulting damage.
- Document FA100001, *Standard Terms and Conditions* lists the terms of the Basler Electric product warranty and is available at www.basler.com.
